

Fact Sheet

Products Made at Abbott Manufacturing Singapore

Abbott Nutrition is a leader in providing safe, high-quality and effective nutrition products for infants, children and adults.

Abbott Nutrition products are made in manufacturing facilities around the world, including the United States, Canada, The Netherlands, Ireland, Spain and Singapore, Abbott's newest facility and the company's first nutritional plant in Asia.

The following pediatric nutritional brands are produced at Abbott Manufacturing Singapore:

- *Similac*®
- *Gain*®
- *Gain Plus*®
- *Grow*® & *Grow School*®
- *Pediasure*® & *PediaSure Complete*®

Similac: Infant formula for newborn babies up to 6 months

- Scientifically formulated with the EyeQ system of nutrients, a unique combination of AA, DHA, choline and taurine, to support brain and visual development
- Unique fat blend with no palm-olein oil to support calcium absorption for strong bones
- Nucleotides (nutrients naturally present in breast milk) to help strengthen a baby's developing immune system

Gain: Follow-on formula for babies 6 months and older

- Scientifically formulated with the EyeQ system of nutrients, a unique combination of AA, DHA, choline and taurine, to support brain and visual development
- Unique fat blend with no palm-olein oil to support calcium absorption for strong bones
- Nucleotides (nutrients naturally present in breast milk) to help strengthen a baby's developing immune system

-more-

Gain Plus: Formula for children 1 year and older

- Provides clinically proven and nutritionally important ingredients to support brain, visual and physical development. This unique combination of nutrients includes AA, DHA, Omega-3 & 6 fatty acids, choline, taurine and iron.
- Supports a child's developing immune system with a patented blend of nucleotides
- Contains prebiotics for a healthy digestive system and probiotics to support a child's natural defenses
- Unique fat blend with no palm-olein oil to support calcium absorption for strong bones

Grow: Growing-up milk for children 3 years and older

- Advanced and nutritionally balanced growing-up milk with DHA, choline, taurine, nucleotides, calcium, vitamin D and other vitamins and minerals, specially formulated to help support the mental and physical growth of children 3 years of age and older
- Contains choline, which is vital to the development of the brain and may impact the development of memory capacity
- Fortified with DHA & taurine to support brain and physical development
- Optimum vitamin D-to-calcium ratio to support strong bone growth

Grow School: Growing-up milk for children 6 years and older

- Grow School contains more than 30 nutrients, including vitamins and minerals.
- Contains choline, which is vital to the development of the brain and may impact the development of memory capacity
- Fortified with taurine to support brain and physical development and calcium and vitamin D for stronger bones

PediaSure Complete: Nutritionally complete and balanced formula clinically proven to promote catch-up growth in children ages 1-10

- Milk-based, lactose-free complete and balanced nutrition from a balanced caloric distribution of protein, fat and carbohydrates to meet the nutritional needs of a growing child
- 28 essential vitamins and minerals required for physical growth and development, as well as choline, taurine and Omega-3 & 6 fatty acids for overall mental development and functioning
- More readily absorbed and easily digested nutrients to produce energy and improve vitamin and mineral absorption
